

Food Armor® Phase I & II Training

HACCP for Proper Drug Use Workshop for Veterinary Practitioners

Veterinary Extension at Ohio State and the OVMA in cooperation with the Wisconsin Veterinary Medical Association, are pleased to present a six-step plan for judicious drug use on dairy and beef cattle operations. This training program will provide the tools to develop and strengthen the drug-managing aspect of the VCPR and reduce residues in meat and milk. Topics will include:

- VCPR
- Drug list
- Protocols
- SOPs
- Records
- Veterinary oversight

Phase I: covers the “what” (knowledge)

Phase II: covers the “how” (implementation)

Participants can attend one or both days. Phase I is required to attend Phase II.

WEDNESDAY & THURSDAY
APRIL 27-28, 2016

Begins at 8:00 a.m. on Wednesday

Location: OVMA
1472 Manning Pkwy, Powell OH 43065

Cost: No cost, but registration is required (sponsored by USDA NIFA)

Registration:
You may register for Phase I (Apr 27), Phase II (Apr 28), or both.

Limited to 25 registrants for each day.

Schedule and More Information:
vet.osu.edu/extension/food-armor

Please contact to register: (Deadline: April 1, 2016)

Veterinary Extension

E-mail: workman.45@osu.edu, Phone: 614-292-9453

E-mail: schuenemann.5@osu.edu

Please bring with you:

- A list of people involved in the VCPR for a typical client
- A list of all drugs (prescription, OTC, and extra label) and dosages used
- Example protocol (e.g., mastitis, metritis) — definition of conditions, drugs used to treat them, standard management procedures, and example records
