Re: Applied Field Epidemiology Program

This is an official invitation for the first meeting of the Applied Field Epidemiology Program formerly known as the FDIU. The objective of the program is to meet regularly and discuss problems occurring state-wide which will lead to research programs and subsequent outreach. At this first meeting we will be discussing the frequency of our gatherings and suggestions are more than welcome.

This will be a collaborative effort and several groups will be invited to attend. Groups included in this first announcement are the following: ODA, OARDC, Veterinary Clinical Sciences, Veterinary Preventive Medicine, Marysville and Animal Sciences.

The meeting will be held at the Department of Veterinary Preventive Medicine, room 240 at 2:00 PM on March 17, 1999. We welcome any and all participation. I look forward to meeting with you.

Yours truly,

William JA Saville, DVM, Diplomate ACVIM, PhD  
Assistant Professor, Extension Epidemiologist  
Director, Applied Field Epidemiology Program  
Department of Veterinary Preventive Medicine  
The Ohio State University
